INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/CA2004/001045

	Box No.	I Basis of the report		
1.	. With regard to the language , this report is based on the international application in the language in whi filed, unless otherwise indicated under this item.			
	which is a second of the white white with the window in the window in the white whit	s report is based on translations from the original language into the following language, ch is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)		
2.	. With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):			
	Description, Pages			
	1-7	as originally filed		
Claims, Numbers		Numbers		
	1-10	as originally filed		
Drawings, Sheets		gs, Sheets		
	1-3	as originally filed		
	□ as	sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing		
3		the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to sequence listing (specify):		
2	had no Supple Supple	his report has been established as if (some of) the amendments annexed to this report and listed below of been made, since they have been considered to go beyond the disclosure as filed, as indicated in the emental Box (Rule 70.2(c)). I the description, pages I the claims, Nos. I the drawings, sheets/figs I the sequence listing (specify): I any table(s) related to sequence listing (specify):		
	+ 7.	f itom 4 applies, some or all of these sheets may be marked "superseded."		

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1-10

1. Statement

Novelty (N) Yes: Claims 8-10

No: Claims 1-7

Inventive step (IS) Yes: Claims

No: Claims

Industrial applicability (IA) Yes: Claims 1-10

No: Claims

2. Citations and explanations (Rule 70.7):

see separate sheet

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Reference is made to the following documents:

D1: US-A-5 043 080 D2: US-A-5 573 676 D3: US-A-5 587 069 D4: US-A-6 083 398

- 2. The subject-matter of claims 1-7 does not fulfill the requirements of Article 33(2) PCT (Novelty).
- 2a. D1 discloses a method for treating water comprising hydrocarbons such as BTX with a UV/H₂O₂/Fe²⁺ treatment system (example 3). The water is circulated between the feed solution tank and the UV reactor (column 5, lines 66-column 6, line 8). D1 is prejudicial to the novelty of the subject-matter of claims 1, 3, 4 and 6 of the present application.
- 2b. D2 discloses a method for treating waste waters containing metal contaminants whereby in a first stage the water is treated with a combination of hydrogen peroxide and UV-light irradiation (claim 1). The UV-light has a wavelength of 185-400 nm (claim 4). Example 3 describes the treatment of water comprising mineral oil. D2 anticipates the novelty of the subject-matter of claims 1-5 of the present application.
- 2c. D3 discloses a method for decontaminating water by adding hydrogen peroxide and irradiating with UV-light (claim 1). Prior to the addition of hydrogen peroxide the water is treated in a coalescing separator (figure 8; column 6, lines 45-60). D3 destroys the novelty of the subject-matter of claims 1, 3, 4 and 7 of the present application.
- 2d. D4 discloses in examples 1 and 2 the treatment of coloured water with hydrogen peroxide and UV-irradiation (column 4, lines 24-34) and anticipates the novelty of the subject-matter of claims 1, 3, 4 and 5 of the present application.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/CA2004/001045

- 3. The subject-matter of claims 1-10 does not fulfill the requirements of Article 33(3) PCT (Inventive step).
 - The only difference of the subject-matter of claims 8-10 of the present application with the prior art is that hydrogen peroxide is added until a phase separation occurs and the water phase is then removed from the organic phase.

 The alleged problem to be solved is to eliminate TOC from the solution in an

The alleged problem to be solved is to eliminate TOC from the solution in an effective way.

It seems that said problem is not solved over the whole range claimed since a phase separation is not obtained for any water containing a contaminant but requires a certain amount of TOC and certain types of contaminants. Furthermore the addition of hydrogen peroxide only will not be sufficient to initiate the phase separation, but irradiation seems also essential during the same period.

Therefore it cannot be seen what problem is solved that is not solved in the prior art.

In addition phase separation is merely one of several straightforward possibilities from which the skilled person would select, in accordance with circumstances, without the exercise of inventive skill, in order to separate the organic contaminants from the water.

Re Item VII

Certain defects in the international application

4. Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in D1-D4 is not mentioned in the description, nor are these documents identified therein.

Re Item VIII

Certain observations on the international application

5. The subject-matter of claim 1 is not clear (Article 6 PCT), since it is defined by the result to be achieved 'until said treatment is achieved' and the expression 'sufficient' is vague and not well-defined. It is not clear after which degree of removal of the contaminants the treatment can be considered as being achieved.
